

PACKING HINTS

West Coast Adventure

Thank you for choosing to explore the incredible Coral Coast with The Great Escape Charter Company.

We recommend that you pack simply, lightly and into one soft luggage bag and one dive bag. All towels and linen are supplied onboard, as well as hairdryers, soap, shampoo & conditioner.

Please ensure you clearly label all luggage, including hand luggage in advance of your cruise. Please note that you will be flying back to Perth from Karratha with Virgin Australia. Your flight is inclusive of one 7 kg piece of hand luggage and one 23 kg piece of checked baggage. Please refer to Virgin Australia's website

to ensure your luggage meets all requirements. All costs and charges for excess luggage (such as dive gear) will be the responsibility of the passenger.

The dress standard onboard MV Great Escape is informal and we suggest barefoot when onboard the vessel. We encourage a casual, relaxed atmosphere. Sporty, light weight, cotton clothing is a good basis for your cruise wardrobe. There is an iron provided on board if you wish to use it.

75% of your cruise takes place along the Coral Coast and you then depart in the Pilbara. The average daily temperature along the Coast is 26°C - 33°C. Shorts and lightweight

shirts are most comfortable but loose long sleeved shirts and long pants in a natural, lightweight fabric, such as cotton, offer protection against the sun. We also recommend a light waterproof jacket for excursions to the shore, as you will come in contact with some spray during the transfer in the tenders.

We provide SPF 30+ sunscreen onboard along with Aeroguard insect repellent, however if you have any known allergies/sensitivities you may like to consider bringing your own.

See next page for your suggested packing list.

The following lists are designed to help you prepare for your adventure:

- Shorts – light and comfortable
- Pants – lightweight
- T-shirts/blouses – short sleeved
- Long sleeved cotton shirt

- Riedy's – B 52
- Strike Pro walking stick (or surfacelure)
- Barra Classics
- Halco – RMG
- Gold Bomber
- Rapala Barra Magnum
- Stiffy Magnum lures

Photography

Be prepared for some excellent photographic opportunities whilst cruising the West Coast.

Video and digital camera batteries can be recharged onboard using 240 volts, for our international guests please be sure to have a converter and adapter plugs with you if required. It is a good idea to bring extra batteries and/or battery charger for your camera and flash. Please also ensure you bring the cable to charge your camera / download images from your camera.

Although our crew do not claim to be experts or professional photographers they all show a keen interest in photography and may just have a few extra tricks up their sleeves. So if you are having trouble with your equipment or need a little assistance give them a shout, they may just be able to help.

If you are not really into photography you will still go home with some great memories as the crew will be capturing fantastic photos of you and the scenery throughout your cruise. You will be given these photos on a USB at the end of the cruise to take home.

Satellite Communications

We have promised you a journey of discovery and an escape from the ordinary with days filled with adventure however we do realise that you may wish to stay in touch with family and friends whilst onboard. MV Great Escape is equipped with state-of-the-art satellite communications which includes satellite WIFI, satellite telephone in the case of emergencies and real time television available onboard (very important for the footy finals)!

Once onboard you can purchase satellite WIFI cards \$60 per device, please note payment is via credit card only. Please ask your Stewardess onboard for more information.

We suggest you download a VOIP app such as Viber, Whatsapp or FB Messenger to call your friends and family whilst onboard. Note the satellite telephone is available in the event of an emergency.

Whilst the system onboard is at the forefront of satellite technology we do ask you to bear in mind it does come with its own limitations. Being a satellite connection it can, from time to time, become unavailable when we least expect it and we ask you to take the remote nature of this connection into consideration.
